Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This is the first Office Action for application number 10/616,419, Flexible Roller Arrangement, filed on 7/9/03. Claims 1-18 are pending.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Fig. 1-3A,

Species II: Fig. 4A,

Species III: Fig. 4B

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, No claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 3632

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Donald Halgren on 8/17/03 a provisional election was made without traverse to prosecute the invention of Species I, Figs. 1, 2, 4 and 9, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-6, line 7 recites the limitation "said support". There is insufficient antecedent basis for this limitation in the claim.

Claim 6 does not further limit claims 1-3 in that claim 2 has already recited that the roller links are "generally cylindrical in shape".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 5711430 to Dudley.

The patent to Dudley discloses an elongated extrusion having an uppermost wall (17), at least one tapered sidewall (16), the sidewall angularly extending from the uppermost wall, a support wall (15), arranged adjacent to the tapered sidewall and the support, a plurality of flexibly connected gripping members loosely within the longitudinal chamber, the gripping members being a plurality of generally cylindrical roller resilient links (25) having a common diameter connected longitudinally by a flexible connecting line (26a). (See Col. 3, line 67 for material selection).

Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 3675782 to Dudley.

The patent to Dudley discloses an elongated extrusion having an uppermost wall (10), at least one tapered sidewall (12), the sidewall angularly extending from the uppermost wall, a support wall (11), arranged adjacent to the tapered sidewall and the support, a plurality of flexibly connected gripping members loosely within the longitudinal chamber, the gripping members being a plurality of generally cylindrical roller resilient links (30) being spaced no greater than their diameter and are connected longitudinally by a flexible connecting line (30a).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
